

NURSERY IRRIGATION

Spinning Sprinkler Head

Plastic whirling head for use on ripe risers. Has 1 large water outlet that will not clog. Covering up to 40' diameter, this plastic whirling sprinkler has been proven itself in the Nursery market for over 30 years. New head design provides water distribution and spray breakup, and its large water outlet is resistant to clogging. The 1/2" female pipe thread makes installation quick and easy.

Roberts 435 / 436 Plastic Spinner Sprinkler

The 435/436 Sprinkler is designed to serve a wide range of applications. Changeable nozzles combined with unique design make it flexible enough to create fine mists or large droplets, at any angle you choose. Simplicity is the key to this remarkable performance. The 435/436 Sprinkler has just one moving part. The result is a durable, reliable sprinkler that will deliver a uniform pattern of mist or droplets just where you need them.

Dramm Pin Perfect Nozzles

PIN PERFECT NOZZLE watering system provides an efficient, permanent, overhead watering system for foliage, bedding, and potted plants. Nozzles can be inserted into galvanized, rigid poly, or flexible poly pipe, and should be spaced every 5' to give complete coverage. Use 3/4" line for up to 50' runs and 1" for 100' runs. Use of different color nozzles on the same line insures even water distribution. Water lines need to perfectly level. Change nozzles colors ever 6 nozzles for even water distribution.

Use NIFTY NOZZLES (180° or 360° pattern) at end of runs to ensure complete coverage

ASSEMBLY INSERTS (ordered separately) are used for easy installation of these nozzles. Using a 7/16" drill, drill holes every 5' in rigid or galvanized pipe. Push in assembly insert and screw in nozzle.
