

MULCH & SOILS

Bark Mulch has many advantages. It reduces garden maintenance, as well as improving growth and fertility. A thick layer of coarse bark on top of the soil prevents weeds from germinating, making it easy to keep beds free from weeds. Weeding is limited to the removing of isolated shoots from time to time. Coarse bark dries out quickly, so any shoots will wither before they become established. On top of all of those benefits, it provides a finished look to the beds.

Pine Bark – Pine Bark mulch and mini nuggets is an all bark mulch made strictly from pine trees. As it decomposes, its organic nutrients will enrich the soil. Both are coarse in nature and dries out quickly helps in maintaining weed free beds.

ITEM #	DESCRIPTION	SIZE
BARKMU3	Pine Mulch	3 cu ft bag
BARKMNG3	Pine Mini Nuggets	3 cu ft bag

Cypress Mulch – Cypress Mulch has the same advantages plus its lighter weight makes installation easier. Its lighter color reduces air temperature and water loss from plants. It is known to hold its color longer than many types of mulch and is also more insect resistant.

BARKCYMU2	Cypress Mulch	2' cu ft bag
BARKRED2	Red Mulch	2' cu ft bag

Pine Bark Soil Helper

Soil Helper bark amendment that facilitates plant growth in soil and is used as a growers base. Made from ground pine bark, the soil conditioner helps hold moisture and nutrients, as well as gives density.

ITEM #	DESCRIPTION
BARK15CF	1.5 Cubic Feet of soil helper

Peat Moss

Canadian Peat Moss is a natural, organic soil conditioner that regulates moisture and air around plant roots for ideal growing conditions. Peat retains up to 20 times its weight in moisture, and releases water slowly as plants need it. Peat moss allows for proper root growth by loosening and aerating soils. By adding body to sandy soil, Canadian peat helps it retain moisture and nutrients. Peat Moss reduces leaching of nutrients in or added to the soil, releasing them over time. Peat Moss can help save on both water and fertilizer.

ITEM #	DESCRIPTION
PEAT38CF	3.8 Cubic Feet of peat moss

Fafard Landscape Mix

A great mixture of 80% pine bark and 20% peat moss that is custom made for caSSco to assure our landscapers have the highest quality products available to them. It is mixed with 2-lb/cu yd of 10-10-10 plant food to provide the optimum nutrients for quick starting and 2-lb/cu yd of Controlled Release Fertilizer for longevity. 1½ lb/cu yd of Stockosorb polymer is added for moisture control.
