SPYARD3	YardTender 30	3 Gallon

POWER SPRAYERS

DRAMM

MSO Sprayer

This multi-purpose hydraulic sprayer has an adjustable pattern and output rate with an adjustable pressure of up to 500 psi. The corrosion resistant pump provides for long life and durable use. An optional cart and 20 gallon tank (pictured right) makes mixing and spraying chemicals easy.

Features and Benefits:

- Trigger gun with adjustable spray patterns and output rates.
- Solid brass and stainless steel pump construction with oilless bearings.
- 120V 60HZ 200 Watts power supply.
- ¼ hp with a 0.5 GPM max. discharge rate
- 6 feet of suction and return hose length, plus 8 feet of power cord.
- Stream spray distance of 20 feet and a mist spray distance of 10 ft.

GAS-MS 20 Sprayer

The Dramm portable Gasoline sprayer can easily apply all formulations of pesticides, fungicides, cleaning products and disinfectants. The GAS-MS features three different regulator settings for your spraying needs, this sprayer will provide thorough and consistent chemical applications. Also available with an optional cart and 20 gallon tank.

Features and Benefits:

- Dual piston pump with uniflow design minimizes wear.
- Bronze and stainless steel construction.
- Adjustable trigger spray gun.
- Three pressure regulator settings: Low-100 psi, Medium-220 psi, and High-350 psi.
- Applies most chemical formulas.
- Features a four-cycle Honda gasoline engine.
- ½ hp with a 1.8 GPM of max. discharge rate.
- Direct Drive with clutch drive system.

Dramm has several other top quality sprayers available. Please call caSSco for more information.

SPRAYERS AND SPREADERS

The SpotShot is ideal for use in lawn, garden, greenhouses, nursery, and anywhere where maximum maneuverability is needed. Contains a Shurflo® with valves and diaphragm that are compatible with most chemicals. The low volume and high pressure (85 psi) make it an ideal choice. SpotShot utilizes a maintenance-free, sealed battery that provides for a full day of spraying and comes with a charger. Comes with a 250psi rated pistol grip gunjet, with 24" extension and curved, flexible tip, and a 15' discharge hose with 200psi. EPDM red spray hose for strength and flexibility. Industrial strength 3.50" x 10" tires built to last. Seven gallon tank with 2 3/4" inch opening and graduation marks makes dispensing and mixing of chemicals easy.

Granular Applicators

T-7 II

A heavy-duty multipurpose spreader ideal for seed, pesticides, and fertilizers. The T7-II is virtually unbreakable, the base and canister are constructed of hi-impact polyethylene with interior exposed metal parts of stainless steel to prevent corrosion. Gear case and drive shaft are enclosed to assure trouble-free operation. Easy to operate with precision control mechanism adjustable during operation and directional control to adjust spread pattern from center, left, or right. Covers up to 20' swath with 20lb capacity.

E-Z Feeder

A fast, easy and economical method of dispensing measured amounts of dry flowable materials such as fertilizer and insecticide (great for Marathon). Great for dispensing granulars and time released fertilizers into containers on the ground. These fully adjustable units operate by pushing down on the plunger, which is returned by a spring. The hopper has a capacity of 500 teaspoons. Good for bench applications by simply removing the extension tube. Comes with an 18" extension tube.

ITEM #	MODEL	APPLICATION RANGE
PLTMMEZ	MM	1/12 thru 1 tsp.
PLTAEZ	A	1/2 thru 4 tsps.
