AQUASCAPE

With the Aquascape system, there is no more piecing your ponds together. The 20 components philosophy is the heart of the system and are all that you need to build a simply spectacular pond. We sell you only what you need at a discount below wholesale when you purchase the complete Aquascape system. One phone call, that's all it takes, everything is shipped complete and ready to assemble. It truly is as simple as that.

Biofalls

The Biofalls filter has revolutionized the pond filtration by becoming the first biological filter that when installed becomes a waterfall. The Biofalls provides the foundation for the multi media filtration system that is the bases of the

Aquascape Ecosystem. Aquascape Designs offer a full line of Biofalls sizes and designs to meet the need of every water feature project. The Classic Biofalls is compatible with all Aquascape Skimmers and is available in 3 sizes that can filter ponds up to 700 sq ft (up to 10,000 gal). The Signature Biofalls features a removable upper plant and rock tray, a circular design for maximum strength, two bulkhead openings for versatility, a high surface filter mats, and much more. Available in two sizes.

Skimmers

Aquascape's Skimmer is the most user-friendly, lowest maintenance, and adjustable design on the market today. Skimmers remove floating debris and provide a place to house and protect the pump. The skimmers are available in two models and four different sizes. The Classic skimmer is compatible with all Aquascape Biofalls. Can handle pumps from 1,000 – 10,000 GPH with pond sizes ranging from 4' x 6' to 16' x 16'. Includes 1 filter mat, skimmer rack, debris net, and lid. Three sizes available. The Signature skimmer has a circular design to provide maximum strength and easy maintenance

with a new large volume, rigid basket. Stainless hardware provides resistance to corrosion and molded stainless steel ensures easy faceplate attachment. Increased volume is 25% larger. Designed to handle two horizontal ADI pumps. Adjustable faceplate allows you to adjust the water level by 4 inches. Two sizes available.

Snorkels & Centipedes

The Snorkel Vault and Centipede Module with its snap together design, allows pond builders the flexibility to design a system to meet large filtration needs. It is also used as a filter and pump housing in the Pondless Waterfall. Available in two sizes, the large Snorkel and Centipede can handle up to 10,000 GPH and can be used for wetland filtration and the Pondless Waterfall. Up to 4 Centipedes can be hooked in to the snorkel. The Micro Snorkle can handle pumps up to 7500 GPH when used with 2 Micro Centipedes for pondless basins with a 2' depth.

AQUASCAPE

Pumps

The pump is the heart of the water feature and caSSco and Aquascape offer a complete line of professional water feature pumps. Choosing a pump for the water feature should be based on a few job requirements. Desired flow rate, pumping height, and electrical costs are a few that need to be considered.

Pipe and Plumbing

A full selection of flexible PVC pipe, pipe fittings, water valves, manifold kits, and more are also available in for endless combinations to complete any pond for every situation. So, make caSSco your one stop shop for the water feature professional.

Installation

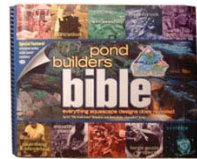

CaSSco offers a complete line of liner material like Aquascape's fish-safe 45 mil EPDM rubber. Liners can be measured to fit any sized job and are cut in convenient 5' increments. Numerous items are available to assist the professional installer, such as geotextile underlayment, rock pads, liner patches, seam tape, and cover tape, installation kits, professional foam gun kits, and black water foam.

Marketing Material

Aquascape Designs offer the comprehensive and complete line of marketing materials to promote the water feature business. To name a few of the tools: *Create a Paradise* sales DVD, *Pond Builders Bible*, signs and banners, t-shirts, a complete line instructional DVDs, Water Garden Excellence Program, Certified Aquascape Contractor (CAC) program and list goes on and on.

Educational Seminars

"Build-A-Pond Days"

A Build-A-Pond is a "hands-on", roll-up your sleeves, do-it-yourself learning system. Build-A-Pond Seminars come in three varieties – Basic, Advanced, and Pondless. Our Basic Build-A-Pond Seminar is the most common and is designed especially for the installer who is just getting started. We use a simple 10'X16' Standard Pond Kit with a 10-12' stream and waterfall using the 20 components and the 20 steps of the Aquascape 20/20 system. The entire water feature is built in one day, start to finish.

Our Build-A-Pondless-Waterfall Day uses the same principles as building a pond, but without the pond. We use a standard kit much the same way as we do in a Basic Build-A-Pond Day but we spend most of the time concentrating on the stream and waterfalls. Our Advanced Build-A-Pond Day Seminar starts with a pre-excavated pond so that we may concentrate on the hook-up of the Skimmer and Biofalls filters, the advanced plumbing involved, and the design and construction of multiple waterfalls and streams.

Our seminars attract pond builders from all over Alabama and the surrounding states. We have had as many as 35 attendees and have donated the finished water features to the Montgomery Zoo, Assisted Living Facilities, Auburn University Horticulture Department, and The Alabama Department of Agriculture to name a few.

Put the experience of Alabama's oldest Aquascape Distributor to work for your company.

FOUNTAINS & AERATORS

Kasco Floating Fountains, Pond Aerators, Water Circulators, and Submersible Landscape Lights blend efficiency, durability, and affordability. Each floating aerating fountain, pond aerator, and water circulator is designed and manufactured in the U.S.A. to withstand the harshest marine environments throughout the world to give you many years of dependable performance. Kasco aeration equipment (Aerating Fountains, Pond Aerators, Water Circulators, De-Icers, and Submersible Landscape Lights) will improve the water quality, enhance the aesthetics, and increase your enjoyment of your pond or lake.

Kasco Marine, Inc. Floating Aerating Fountains, or Decorative Fountain Aerators, add class and beauty to any body of water while adding essential dissolved oxygen and aeration to the pond or lake and agitation to eliminate stagnant water for improved pond and/or lake aeration and water quality. Kasco offers floating fountain models in 1/4, 1/2, 3/4, 1, and 2 horsepower sizes to accommodate a wide variety of pond/lake sizes. The 1/4hp, 1400JFL, Aerating Fountain is ideal for the small backyard pond or water garden. Our 1/2, 3/4, and 1hp VFX Aerating Fountains have increased fountain pattern size and aeration and are the ideal mix of beauty and efficiency. We have also improved the 8400JF, 2hp Aerating Fountain for increased fountain pattern size. We are also proud to introduce our NEW 3400JF, 3/4hp Aerating Fountain with 5 Interchangeable Patterns Included!

Please contact a caSSco representative to assist you when trying to decide which floating fountain, pond aerator, or water circulator is best for your application.
